

USING ELECTROPHYSIOLOGY TO STUDY HEALTHY AGING

PAID OPPORTUNITY TO PARTICIPATE IN RESEARCH!

- ◇ Electroencephalography (EEG) is a safe, non-invasive way to measure brain function.
- ◇ During the study, you will wear an electrode cap to detect your brain's electrical activity.
- ◇ ~2 hr study includes visual and cognitive measures plus short EEG experiments.
- ◇ **\$40 for your participation.**

INTERESTED?

Please contact us at the email address below. Participants must be between the ages of 18-30 or 60-87. Participants **may not** have a history of severe concussions, heart conditions, schizophrenia, or seizures. Questions about these criteria? Let us know.
